

## Use of Intoximeter by School Administrators

When reasonable suspicion exists that a student has consumed any alcoholic beverage and disciplinary action has been ordered as a result of that suspicion, the student may voluntarily submit to an intoximeter test. The test will be administered in a private setting by a school administrator who has been trained in the use of the intoximeter. If the test results indicate that the student has not consumed alcohol, the disciplinary action based on alcohol consumption will be rescinded. If the results indicate that the student has consumed alcohol, the disciplinary action shall continue. No student will be disciplined for refusing to take an intoximeter.
